A big **thank you** to our summer students, **Hunter & Kohen**, for all your hard work, energy, and help throughout the summer!
We've loved having you both as part of the team and truly appreciate everything you've contributed. You helped make our summer brighter and busier, and we're so grateful for all that you did!
Wishing you both a fantastic **back-to-school season** filled with new adventures, great memories, and lots of success!

Next council meeting is

Respect Your Sewer System:
Think Before You Flush

Our sewer systems work hard to keep our communities clean, healthy, and running smoothly. We can all help protect this important infrastructure by being mindful of what we put down our toilets and drains.

Toilets Are Not Garbage Cans

The toilet is designed to handle human waste and toilet paper—nothing more. Items that don't break down properly can cause clogged pipes, sewer backups, damage to pumps, and costly repairs.

Please do not flush:

- Paper towels or cleaning wipes
- Baby wipes, even if labeled "flushable"
- Sanitary napkins, tampons, or other feminine hygiene products
- Condoms
- Cotton swabs or cotton balls
- Dental floss
- Facial tissues
- Diapers
- Grease, fats, or oils

Even products labeled "flushable" may not break down quickly enough to safely travel through the sewer system.

Please treat our sewer system with respect. What we flush today can affect our pipes, our neighbours, and our community tomorrow.

Water Billing Notice

Please be advised that water bills will be estimated for the next couple of months.

Due to recent computer system updates, our current water meter reading software is no longer compatible with the updated system and is unable to process meter readings. While we complete the necessary software updates, we will be issuing estimated water bills.

We appreciate your patience and understanding as we work to restore normal meter reading and billing as quickly as possible.
